

BTCBAM – Characteristics

1. Is this a centralized or decentralized coin?

BTCBAM is a decentralized coin.

2. Is BTCBAM Mining System only be mine BTCBAM coin?

BTCBAM Mining System gives a chance to mine totaly 7 coin in their system to its inverstors. First coin called same as mining system "BTCBAM". Other coins/tokens will be produced into the three years after first coin will be on the exchange markets.

3. Is there any exchange market that BTCBAM was already listing?

BTCBAM was listing in two markets. One of them its own market called Bitturex and since 21 Sep 2020 BTCBAM was listing one of the hight volume market in the world, Coinsbit.io

4. A lot of other coins are already claiming to be “better” than Bitcoin, so how is BTCBAM any diffrent?

BTCBAM is a unique coin for investors who want to make medium and long term investments. However, it can also be used for short-term trading opportunities. Both Bitcoin and BTCBAM are impractical for small daily transactions. For this reason, it will be much more profitable to buy and hold. We believe BTCBAM has the potential to become an alternative to gold in 10 to 20 years, just as people invest money in gold in hopes that its value will increase as a long-term investment.

So is this mining going to run parallel to Bitcoin?

Mining will be conducted on ASIC miners, just as with Bitcoin. It's actually the same source code as that of Bitcoin, but the start of a new genesis coin.

Many other coins are mined with GPU's. The disadvantage of GPU's is that they are much more expensive than ASIC per TH. 10,000 USD/T VS 50 USD/T. This limits the growth of the economy of GPU's. Investors prefer to get more T for their money, and this is one of the reasons that the Bitcoin mining economy is 100 times bigger than the second coin in the market, Ethereum, running on GPU's.

BTCBAM– FAQ

5. Is this going to be an open source project that any developer can comment or work on?

BTCBAM is open source, just like Bitcoin. The coin will be launched in a fair manner with no premining or ICO. The developers don't hold the funds of the coin and don't get a percentage from emissions. BTCBAM is built upon a loyal community and open source code.

6. When a transaction is canceled will there be a transaction fee to send it back? There will only be a small normal commission fee, similar to that of Bitcoin.

7. What is the max supply of BTCBAM coins?

The total number of coins will amount to 21,000,000 (exactly the same as Bitcoin).

8. What is the algorithm on BTCBAM coin?

SHA-256 (Secure Hash Algorithm) is one of the 6 sets of cryptographic hash algorithms under SHA-2. It was developed by the US National Security Agency (NSA), an expert on cryptology. SHA-256 is used in bitcoin mining proof-of-work calculations and bitcoin address creation. It is one of the most secure encryption functions known.

9. What is the expected value of the coin when it will be launched on exchanges in Coinsbit.io and Binance?

The exact value of the coin cannot be estimated before its launch on exchanges. This will depend on the amount of network hashrate, supply and demand, and numerous other factors at that time.

10. How many coins will be available for mining every day?

BTCBAM is expected to catch up to the current market supply of Bitcoin. However, it will achieve it much faster than Bitcoin did. Have a look at the last page of that document for more information. We prepared a detailed description about rewards.

11. Why do you think the BTCBAM coin will grow in terms of adoption?

There are numerous reasons to expect huge adoption of BTCBAM

–BTCBAM Mining System community is currently estimated to have created a revenue of a few billion dollars in the next 3 years with an expected community of millions members.

–The preference of crypto money more and more every day, paper money falling out of favor during the pandemic process and the fact that the European central bank will issue its own digital currency give hope for the future.

–Once growth of the value of BTCBAM is visible on exchanges, due to the adoption of the our community, this can create a snowball effect among the entire crypto community enabling the value to grow on a scale compared to Bitcoin in 2017. This is a huge opportunity for BTCBAM Minings System to take part as initial adopters, as they will have exclusive access to the coin before others want to get their hands on it.

–Many crypto mining companies are already using ASIC miners, enabling them to use the same miners they were using for mining Bitcoin to mine BTCBAM. As they see growth and development in the new project, there is huge potential for them to join at a much faster rate due to not having to develop any new mining equipment.

12. What is the expected ROI (Return on Investment) from BTCBAM mining?

The ROI cannot be calculated at this stage of development of the project. Once BTCBAM is listed on exchanges, the ROI may be estimated.

What should be emphasized, however, is that BTCBAM Mining System gives a unique opportunity of becoming an early adopter of BTCBAM, an exclusive option for the BTCBAM Mining System community. This enables the community the possibility to take part in the project at an early stage.

The potential growth rate, in terms of percentage, is much higher for BTCBAM than other coins/tokens on the market due to the low price of the coin at the launch on exchanges.

13. How will BTCBAM be distributed in a more decentralized manner and enable an equal and fair chance to the entire crypto community if BTCBAM Mining System will be the only early adopters before the global adoption?

- First of all, there will be no pre-mining of BTCBAM. This means that the initial distribution of BTCBAM will be to all miners at the same time, enabling fair play.
- Second of all, BTCBAM will be distributed to the Minings System community at the early stages of its adoption, which makes it possible to reach more than 100,000 accounts in its early days.
- Also, once BTCBAM is listed on exchanges, the liquidity of the coin has the potential to increase significantly, which will enable users to buy and sell it worldwide and distribute it further.
- In addition, one needs to remember that the cryptocurrency market has evolved since its beginning and the process of adoption of new coins is faster now than in the past. The simplicity of setting-up new crypto wallets, registering on exchanges and increasing awareness of the global community about cryptocurrencies has never been at such an advanced level as it is today.

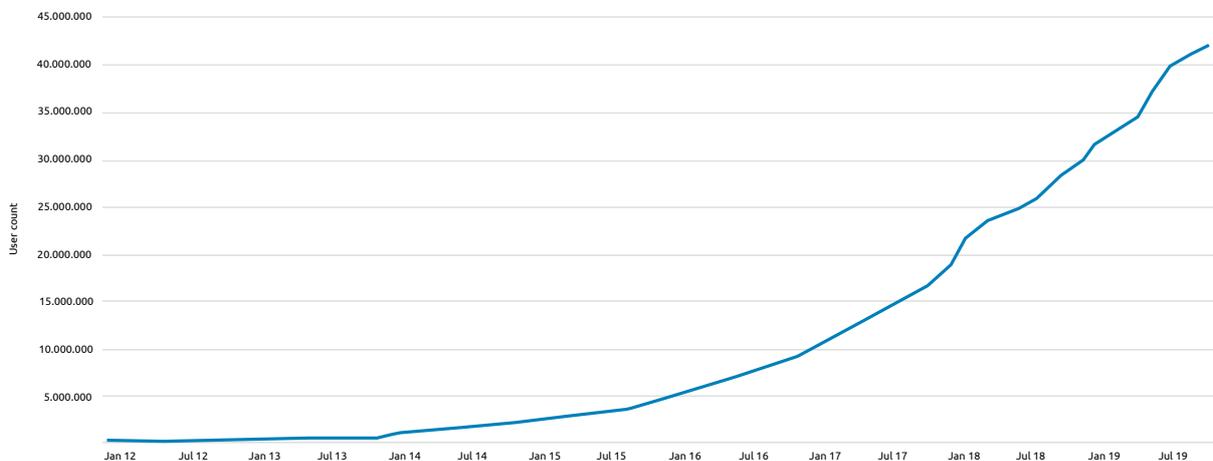

BTCBAM– FAQ

EXAMPLE:

The total number of blockchain wallet users 3 years after launching Bitcoin was only at 451 on 4th January 2012. Just to compare, Current growth rate is 30,000 wallets a day by December 2019. The global adoption starting from January 2012 increased rapidly across the following years, according to the graph presented below.

Blockchain Wallet Users

Source: <https://www.blockchain.com/en/charts/my-wallet-n-users?timespan=all>

BTCBAM has the potential for a much faster adoption rate and is planned to be quickly listed on exchanges, which will make it incomparably more distributed, decentralized and more equal for the whole crypto mining community.

14. It has been stated that BTCBAM listed on exchanges in July of 2020. Does this mean that only the coins which have been mined by BTCBAM Mining System will be distributed on said exchanges? Is there a lock-up for any of the coins?

Once BTCBAM is listed on exchanges, anyone who has mined, bought or received the coins will be able to make buy and sell orders on said exchanges. There is no pre-mining or lock-up period.

BTCBAM– FAQ

15. It has been seen that one can predict the price of a coin in relation to the hash rate. Does this theory apply to BTCBAM?

There is no direct correlation between hash rate and price, but as seen in the chart below there is generally a larger market cap in relation to larger hash rates. Prices of coins are set by the market; buy and sell orders on exchanges. With POW there is a real economy produced within and outside of the crypto-economic plan, which is generally proportional to a growing hash rate. “The price of any commodity tends to gravitate toward the production cost.” – Satoshi Nakamoto

		Hash Rate	Marketcap
	Bitcoin	95 EH/s	132 B \$
	Bitcoin Cash	2.5 EH/s	4 B \$
	Bitcoin SV	1.2 EH/s	1.7 B \$

16. It is important that BTCBAM is recognized by the entire crypto ecosystem and community. Are there any prepared plans for advertising, marketing and technical merit of the project?

It is up to the community to support, advertise, and market the project, similarly to Bitcoin. We believe after the coin is listed on exchanges and the interest will be visible among the entire crypto ecosystem, there is potential for autonomous marketing to scale even faster than that of Bitcoin.

Mining System already begin campaigns in Turkey and all over the world.

You can find them from official accounts in our social medias.

17. Is it an objective of BTCBAM to compete against Bitcoin and the others? There is no objective to compete against other coins, as there are generally different use cases for each of them. However, mass adoption would be beneficial in terms of the project’s success, and it is up to the community to support the project and make it one of the highest ranked coins in the market, just as previously done with Bitcoin. BTCBAM is adding to the entire crypto-ecosystem than competing against other projects.

Commissions & Plan Options

1. Is there a membership fee or any hidden costs in buying BTCBAM Mining plans? No, there is no additional membership fee or hidden costs in buying BTCBAM Mining plans.

2. Is the goal of equal distribution practical (because there will always be people who want more than others, unless you give away an equal amount to people for free)? Isn't it possible for some to want more than others and buy as much as they want?

This is true, but what we can do is give a fair chance to everyone to mine it or buy it when value is still in the early stages, while encouraging others to take notice and advantage of the benefits of BTCBAM, similar to how many reaped the benefits of being early adopters of Bitcoin.

3. What are the plan options in terms of hashrate, duration, etc.?

The duration is the same for all packages in BTCBAM Minings System. But the hashrate show some differences between package. The package options will remain the same to the end of the time.

4. How will the airdrop for the BTCBAM Mining System look like?

There wont be any airdrops in BTCBAM Mining System for the first coin that er called BTCBAM. But when Mining System begin to produce its second coin those who buy plans from BTC coin will receive an airdrop. Each account will be awarded with %20 of second coin against the total amount of package price per people.

5. Commissions?

If you purchase BTCBAM Mining System plans, you will receive a commission from your downliners who also purchase BTCBAM Mining plans. This will increase the demand for the community to purchase these plans.

6.Commission Plan

In the BTC BAM Mining system, each member earns commission income through the new member they add to the system. 10% of the cost of the mining package preferred by the new member is instantly paid to the member who includes him in the system. According to the binary model, commission payments are made for new member entries up to the 7th level.

Commissions are made only for €(euro). The member can only get a new mining package with his commission income. If the commission amount is not enough to buy a new package, you can buy a new package by paying the missing balance to the Mining System.

The tiers and commission rates are listed in the table below.

1.	Depth	10% reference income is paid.
2.	Depth	6% reference income is paid.
3.	Depth	5% reference income is paid.
4.	Depth	4% reference income is paid.
5.	Depth	3% reference income is paid.
6.	Depth	2% reference income is paid.
7.	Depth	1% reference income is paid.

7. How do I pay for the plan?

After being a member of BTCBAM Mining System, you can pay the package price with approximately 120 digital currencies through the Coinpayments platform. You can reach the guide describing these stages on our website.

8. When are commission payments taken into account?

As soon as the person who registers to the system with your link buys the mining package, it is automatically reflected in your account.

9. Does mining of BTCBAM start 7 days after purchase? Why?

Yes, initially the mining of BTCBAM starts 7 days after purchasing the plan. 7 days are required to buy new equipment and install it at the facility. We will notify the community in case of any changes.

10. Will BTCBAM mining always start after 7 days of purchasing a plan or will this time be shorter in the future?

During the pre-sale phase, mining started after package purchasing. As we install an increasing amount of miners dedicated to mining BTCBAM, we increased the time between purchase of BTCBAM plans and the start of mining. If there are any changes we will notify the community. The other coins which will begin after BTCBAM, they will also have presale and no waiting period of begin mining.

11. Will BTCBAM Mining plans be purchased using BTCBAM coin?

BTCBAM mining plans can be bought using Coinpayment at the time. Ultimately, in the long-term perspective, the payments for BTCBAM mining plans will be accepted only in BTCBAM.

BTCBAM– FAQ

12. Is it possible to receive commissions from BTCBAM plans without buying a plan?

Without buying a BTCBAM mining plan you can't receive any commissions the system. There is only way to earn commission is first you have at least one mining plan and send your link to anyone who will also buy a plan.

13. Will BTCBAM mining plans have the possibility of repurchases?

Yes, there will be an option to repurchase BTCBAM plans. You can repurchase whenever you want from mining system.

14. After the purchase of a BTCBAM mining plan, will commission be distributed immediately?

The commissions are paid out immediately, as a €(euro).

15. Is it more beneficial to buy a BTCBAM mining plan as soon as possible?

The earlier you buy a plan, the quicker you will be able to build your binary tree and earn commission and mine BTCBAM. Then once rising starts you will begin to earn much more than those who are waiting to buy.

Dear community,

We would like to present the change schedule for BTCBAM rewards . It is important for us to ensure the awareness of this groundbreaking project, and why is it vital and beneficial to be an early adopter of this. Please see the chart below for a detailed explanation of when BTCBAM award changes are expected to change.

Schedule of BBTCBAM Reward Changes

Algorithm SHA-256
Block type Proof-of-Work
Coin name BitcoinBam
Coin abbreviation BTCBAM
Address letter B
Address letter testnet K
Coin unit Bamoshi
Block reward 26 coins
Block halving 210000 blocks
Coin supply 21000000 coins
Coinbase maturity 2 (+ 1 default confirmation) blocks
Target spacing 5 minutes
Target timespan 10 minutes
Transaction confirmations 1 blocks
Last block with reward 6720000
Time until last block 63 years, 10 months, 18 days, 8 hours

We hope that this is a clear explanation. If you have any further questions please feel free to contact us via contact form in Customer Panel

All the best,
BTCBAM Mining System
